***Reasons For Allowance***

1. The following is an examiner's statement of reasons for allowance: US 5,145,684 (Liversidge) and US 6,221,399 (Rolfes) are representative of the art at the time of the invention. Rolfes teaches a process for making a controlled release product for oral administration from an interpolymer complex and an active agent. Liversidge teaches disposable particles consisting essentially of a drug substance having a surface modifier absorbed on the surface thereof. The prior art, however, does not teach hydrophilic inclusion complexes. An inclusion complex is formed when one component (the host) forms a cavity or crystal lattice containing spaces in which molecular entities of a second chemical species (the guest) are located. One of ordinary skill in the art would recognize that the coatings and surface modifiers described by the prior are fundamentally different from an "inclusion complex" and would exhibit different chemical and biological stabilities.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
